DETAILED ACTION

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The present invention provides a new method of conversion-to-array for creating array configuration data, in which the repetition pitch in case of the maximum number of repetitions may be selected from a plurality of predetermined candidates of the repetition pitch such that the repetition pitch may be optimized and, consequently, the data may be compressed efficiently compared with the conventional method (specification, page 3, lines 1-7).

In particular, the prior art, taken either singly or in combination, does not teach:

- classifying the patterns congruent with a master pattern, which is a reference graphic for repetition, in the patterns arranged as mask patterns of a LSI, so that the number of the repetitions of the congruent pattern is the largest one when the congruent pattern is arranged repeatedly with a predetermined repetition pitch (see independent claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
